## EFFORT TO MORE EFFICIENTLY USE D.C. COMPLEX STORAGE SPACE LAUNCHED.....

On April 5, 1976, Assistant Secretary Bolduc wrote to each agency head calling attention to poor utilization of South and Auditors Building storage space. In FY 1976, the Department will spend over \$1 million for the 212,000 square feet of storage space used or misused in the D.C. Complex (cost was \$4.76 per square foot this year). By getting rid of our bumper crop of useless junk, initiating efficient storage practices, and turning misused storage areas back to GSA, we can cut this bill in half and, at the same time, eliminate many of the fire and safety hazards in the Complex. OO is following up with agency Administrative Services Directors to drastically improve this storage space utilization. (Contact: Al Cauley, OO, ext. 72815)

Several of the agencies with potential for large savings have not responded, or are responding slowly, to this savings program. Including the reductions to date, OO's records indicate there are still more telephones than employees. A one-for-one or even 90 percent ratio should be cause for concern. A little more effort could substantially increase the savings to date. (Contact: Bill Roth, OO, ext. 75225)

FEBRUARY'S CONTROLLED CORRESPONDENCE VOLUME DOWN FROM LAST YEAR; ON-TIME RATE STABLE AT 60%..... Although on-time rates have been running 60-65% for the last ten months, more improvement is needed. The amount of overdue but unacknowledged correspondence continues to be the biggest single problem. It's now possible to extend the deadline in the few instances where -- for valid reasons -- a letter can't be answered within present time limits. See your Correspondence Control Officer for the ground rules. (Contact: Jerry Pepper, 00, ext. 78393)
